MEMS 3000 Alcohol Monitor

testing, Field Services, and a 24 hour/7 days per week staff for effective, through monitoring.

ELECTRONIC HOME MONITORING

Presence Monitoring

Presence monitoring is a method of remote supervision of offenders within communities by using a monitoring system in their home or other designated location.

Minnesota Monitoring offers:

- E3 landline / E3 Voice
- E3 Voice

Multiple tamper detections, flexible schedule options, and powerful backup mechanisms are just some of its advantages.

Alcohol Monitoring

Remote alcohol monitoring devices measure the tested individual breath alcohol level; results are transferred to the monitoring center. The alcohol monitoring system can be utilized as an independent measure, or in combination with a restrictive home detention schedule.

Minnesota Monitoring offers:

- Mems 3000 VB and VBR

Highly accurate electro-chemical testing, color picture facial recognition, scheduled, random, or on-demand tests, multiple reporting options, and integrated RF are just some of its advantages.

Real Time Tracking

Real time tracking is the action of monitoring an individual's location and trail, by using global positioning satellite system and/or ground location technologies.

Minnesota Monitoring offers:

- STaR

Multiple tracking modes, advanced mapping and path surveillance, and quicker GPS acquisition are just some of its advantages.

DRUG TESTING SERVICES

Minnesota Monitoring offers numerous tests for drugs of abuse.

MMI offers the following drug testing programs and detection solutions to meet all the needs of offender drug testing.

- **Urinalysis Testing**- offers an immediate pass/fail result and can be confirmed using GCMS laboratory confirmation
- **Hair Testing**- offers a much larger drug detection window of 180 days or even longer
- **ETG—Urine Ethyl Glucuronide Testing**- is a urine based test for the consumption of alcohol with a detection window of 80 hours.
- **Oral Fluids**— non-gender specific ability to test for drugs of abuse. Offers immediate pass/fail results. Can be confirmed using GCMS laboratory confirmation.

- **Sweat Patch**—offers a unique ability to act as a deterrent and detects drugs of abuse

Minnesota Monitoring also offers DNA testing

- **Paternity**

- **Forensic**

No Appointments Necessary & Results Typically Provided in 24—72 Hours.
